## Typical Product Specifications & Properties

# Fluometuron

CAS Number: : 2164-17-2

| Specifications      | Limits                                                                         |
|---------------------|--------------------------------------------------------------------------------|
| Molecular weight    | 232.20                                                                         |
| EINECS              | 218-500-4                                                                      |
| InChI               | 1S/C10H11F3N2O/c1-15(2)9(16)14-8-5-3-4-7(6-8)10(11,12)13/h3-6H,1-2H3,(H,14,16) |
| InChIKey            | RZILCCPWPBTYDO-UHFFFAOYSA-N                                                    |
| Density             | 1.39                                                                           |
| Storage Temperature | 0-6&deg;C                                                                      |
| Water solubility    | Slightly soluble.<0.1 g/100 mL at 21.5 &#186;C                                 |
| Melting Point       | 163&deg;C                                                                      |
