

## Typical Product Specifications & Properties

# Fluorocyclopropane

CAS Number: : 1184-60-7

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Fluorocyclopropane is a three-membered carbon ring with two hydrogen atoms and one fluorine atom attached to each carbon. The structure is shown with stereochemistry, including wedged and dashed bonds. A watermark for 'parchem fine &amp; specialty chemicals' is visible in the background of the structure.</p>
