

Typical Product Specifications & Properties

Fluorotripentylstannane

CAS Number: : 20153-49-5

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Fluorotripentylstannane is a complex polycyclic molecule. It features a central tin atom (Sn) bonded to three pentyl groups and a fluorine atom. The structure is shown in a 3D perspective, with the tin atom at the center and the pentyl groups extending outwards. The fluorine atom is also bonded to the tin atom. The structure is overlaid with a watermark that reads 'parchem fine & specialty chemicals'.</p>
