

Typical Product Specifications & Properties

Fmoc-2,5-Dichloro-D-Phenylalanine

CAS Number: : 1260614-80-9

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a fluorenylmethyloxycarbonyl (Fmoc) group attached to a 2,5-dichloro-D-phenylalanine moiety. The Fmoc group consists of a fluorene system with a methylenedioxy bridge. The phenylalanine part is a benzene ring with two chlorine atoms at the 2 and 5 positions, and a side chain containing a chiral center (D-phenylalanine) with an amino group. The structure is overlaid with a 'parchem fine & specialty chemicals' watermark.</p>
