

## Typical Product Specifications & Properties

# Fmoc-lys(biotin-peg4)-oh

CAS Number: : 1334172-64-3

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a complex molecule with a biotin moiety (a bicyclic system with a urea bridge and a carboxylic acid group) linked via a PEG4 chain to a lysine residue. The lysine is protected with an Fmoc (fluorenylmethyloxycarbonyl) group. The structure is overlaid with a 'parchem fine &amp; specialty chemicals' watermark.</p>
