## Typical Product Specifications & Properties

# Furan, 2-((phenylmethoxy)methyl)-

CAS Number: : 1796574-10-1

Specifications	Limits
Chemical Structure	 The chemical structure shows a furan ring substituted at the 2-position with a (phenylmethoxy)methyl group. The furan ring is a five-membered aromatic ring with an oxygen atom. The substituent consists of a methylene group attached to the furan ring, which is further attached to a phenyl ring via an oxygen atom. The structure is drawn with stereochemistry indicating a specific enantiomer.
