

Typical Product Specifications & Properties

Furan, 3-chloro-2-ethynyltetrahydro-, cis-(9Cl)

CAS Number: : 189498-30-4

| Specifications | Limits |
|--------------------|--|
| Chemical Structure | <p>The chemical structure is a complex polycyclic molecule. It features a central benzene ring. Attached to the benzene ring is a furan ring (a five-membered ring with one oxygen atom). Also attached to the benzene ring is a tetrahydrofuran ring (a five-membered ring with one oxygen atom). A chlorine atom (Cl) is attached to the tetrahydrofuran ring. A triple bond (ethynyl group) is attached to the tetrahydrofuran ring. The stereochemistry is indicated as cis-(9Cl).</p> |
