

Typical Product Specifications & Properties

Furan, methylpentyl-

CAS Number: : 1096687-70-5

Specifications	Limits
Chemical Structure	 The chemical structure is a complex polycyclic molecule. It features a central furan ring (a five-membered ring with one oxygen atom) fused to several other rings, including a six-membered ring and a five-membered ring containing a nitrogen atom. The structure is highly branched and includes various functional groups, such as hydroxyl groups and a methyl group. The overall structure is a complex polycyclic molecule with a furan ring.
