## Typical Product Specifications & Properties

# Furylacrylic Acid

CAS Number: : 539-47-9

| Specifications   | Limits                                                |
|------------------|-------------------------------------------------------|
| Molecular weight | 138.12                                                |
| EINECS           | 208-718-8                                             |
| SMILES           | <chem>OC(=O)C(=C)c1occc1</chem>                       |
| InChI            | 1S/C7H6O3/c8-7(9)4-3-6-2-1-5-10-6/h1-5H,(H,8,9)/b4-3+ |
| InChIKey         | ZCJLOOJRNPHKAV-ONEGZZNKSA-N                           |
| Merck            | 14,4297                                               |
| Boiling Point    | 286 &deg;C                                            |
| Flash Point      | 286&deg;C                                             |
| Melting Point    | 139-141 &deg;C                                        |
| BRN Number       | 81046                                                 |
