

Typical Product Specifications & Properties

Gemifloxacin

CAS Number: : 175463-14-6

Specifications	Limits
Molecular weight	389.3809
Assay/Purity	Typically NLT 98%
Chemical Structure	 The chemical structure of Gemifloxacin is displayed. It features a quinolone core with a cyclopropyl group at the 8-position, a fluorine atom at the 6-position, and a side chain at the 2-position that includes a methoxy group and a secondary amine. A watermark for 'parchem fine & specialty chemicals' is visible over the structure.
