

## Typical Product Specifications & Properties

# Glucoside

CAS Number: : 101930-95-4

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Glucoside is a complex polycyclic molecule. It features a central ring system with several substituents, including a hydroxyl group (OH) and a nitrogen atom (N). The structure is shown in a 3D perspective, with bonds indicating stereochemistry. A watermark for 'parchem fine &amp; specialty chemicals' is visible in the background of the structure.</p>
