

## Typical Product Specifications & Properties

# Glycine, N-[(3-amino-4,6-dimethylthieno[2,3-b]pyridin-2-yl)carbonyl]-

CAS Number: : 1041546-42-2

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a complex molecule consisting of a thieno[2,3-b]pyridine core. This core has a methyl group at position 4, an amino group at position 3, and a carbonyl group at position 2. The carbonyl group is part of a glycine residue, which is attached to the nitrogen atom of the pyridine ring. The structure is drawn with stereochemistry indicated by wedges and dashes. A watermark for 'parchem fine &amp; specialty chemicals' is visible in the background.</p>
