

Typical Product Specifications & Properties

Glycine, N-[3-(trifluoromethyl)benzoyl]-

CAS Number: : 17794-48-8

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a benzene ring with a trifluoromethyl group (-CF₃) at the 3-position. This ring is connected via a carbonyl group (-C(=O)-) to a nitrogen atom, which is further connected to a glycine residue (-CH₂-COOH). The structure is overlaid with a 'parchem' watermark and the text 'fine & specialty chemicals'.</p>
