Typical Product Specifications & Properties

Glycine, N,N-bis(2-pyridinylmethyl)-

CAS Number: : 138555-54-1

Specifications	Limits
Chemical Structure	 The chemical structure shows a central glycine molecule (a five-membered ring with two nitrogen atoms and two oxygen atoms) substituted with two 2-pyridinylmethyl groups. The pyridine rings are shown in a 3D perspective, with one ring in the foreground and one in the background. The glycine ring is in the center, with the two nitrogen atoms and two oxygen atoms. The two 2-pyridinylmethyl groups are attached to the nitrogen atoms of the glycine ring. The structure is labeled with 'parchem fine & specialty chemicals'.
