

Typical Product Specifications & Properties

Guanidine 2-hydroxybenzoate

CAS Number: : 1928823-70-4

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Guanidine 2-hydroxybenzoate is shown. It features a benzene ring with a hydroxyl group (-OH) at the 2-position. Attached to the ring is a guanidine group, which consists of a central carbon atom bonded to three nitrogen atoms. One nitrogen is part of a five-membered ring fused to the benzene ring, while the other two nitrogens are part of a guanidine group. The structure is labeled with 'H' and 'O' for hydrogen and oxygen atoms, respectively. A watermark 'parchem fine & specialty chemicals' is visible in the background.</p>
