

Typical Product Specifications & Properties

Heptamidine dimethanesulfonate

CAS Number: : 161374-55-6

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Heptamidine dimethanesulfonate is a complex polycyclic molecule. It features a central seven-membered ring (heptamidine) with a dimethanesulfonate group attached. The structure is shown with stereochemistry, including wedged and dashed bonds. A watermark for 'parchem fine & specialty chemicals' is visible in the background of the structure.</p>
