

## Typical Product Specifications & Properties

# Hexakis(2-ethylbutoxy)disiloxane

CAS Number: : 1476-03-5

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a central disiloxane core (Si-O-Si) where each silicon atom is bonded to three 2-ethylbutoxy groups. The 2-ethylbutoxy groups are represented as branched chains with an oxygen atom at the point of attachment to the silicon. The structure is overlaid with a large, faint 'parchem' watermark and the text 'fine &amp; specialty chemicals'.</p>
