Typical Product Specifications & Properties

Hexanal phenylhydrazone

CAS Number: : 1543401-60-0

Specifications	Limits
Chemical Structure	 The chemical structure shows a hexanal chain (a six-carbon aldehyde) reacting with phenylhydrazine to form a phenylhydrazone. The structure is depicted with stereochemistry, showing the hexanal chain in a zig-zag conformation and the phenylhydrazone group attached to the terminal carbon. The phenyl ring is shown in a perspective view, and the nitrogen atom is highlighted in blue.
