

## Typical Product Specifications & Properties

# Hexaphenoxycyclotriphosphazene

CAS Number: : 1184-10-7

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Hexaphenoxycyclotriphosphazene is a complex polycyclic molecule. It features a central cyclotriphosphazene core, which is a six-membered ring consisting of alternating phosphorus (P) and nitrogen (N) atoms. This core is substituted with six phenoxyl groups, each consisting of a benzene ring attached to an oxygen atom. The structure is shown in a 3D perspective, with stereochemistry indicated by wedge and dash bonds. A watermark for 'parchem fine &amp; specialty chemicals' is visible in the background of the structure.</p>
