Typical Product Specifications & Properties

Hexyl 5-fluoronicotinate

CAS Number: : 1315348-05-0

Specifications	Limits
Chemical Structure	 The chemical structure shows a hexyl chain (a six-carbon alkyl group) attached to the nitrogen atom of a pyridine ring. The pyridine ring has a fluorine atom at the 5-position and a carboxylate group at the 3-position. The carboxylate group is shown as a carboxylic acid, with a hydrogen atom and a hydroxyl group attached to the carbonyl carbon. The pyridine ring is fused to a six-membered ring containing an oxygen atom and a nitrogen atom, which is part of a larger bicyclic system. The structure is labeled with 'parchem fine & specialty chemicals'.
