## Typical Product Specifications & Properties

# Isoquinoline-N-oxide

CAS Number: : 1532-72-5

| Specifications     | Limits                                                                                                                                                                     |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Molecular weight   | 145.16                                                                                                                                                                     |
| Melting Point      | 103-105 C                                                                                                                                                                  |
| Appearance         | Light brown crystalline powder                                                                                                                                             |
