## Typical Product Specifications & Properties

# Malonic Acid

CAS Number: : 205-503-0

| Specifications      | Limits                                                              |
|---------------------|---------------------------------------------------------------------|
| Molecular weight    | 104.06                                                              |
| EINECS              | 205-503-0                                                           |
| Merck               | 14,5710                                                             |
| Melting Point       | 132-135 &deg;C (dec.)                                               |
| Boiling Point       | 140?(??)                                                            |
| Water solubility    | 1400 g/L (20 °C)                                                    |
| BRN Number          | 1751370                                                             |
| Stability           | Stable. Incompatible with oxidizing agents, reducing agents, bases. |
| Storage Temperature | Store at room temperature.                                          |
| Density             | 1.619                                                               |
| Flash Point         | 157&deg;C                                                           |
