Typical Product Specifications & Properties

methyl nicotinate

CAS Number: : 93-60-7

Specifications	Limits
Appearance	colorless to pale yellow solid
Boiling Point	209.00 °C. @ 760.00 mm Hg
Odor Type	herbal
Odor	warm herbal tobacco
Assay	98.00 to 100.00 %
Vapor Pressure	0.208000 mm/Hg @ 25.00 °C
Flash Point	204.00 °F.TCC
Melting Point	38.00 to 43.00 °C. @ 760.00 mm Hg
logP (o/w)	0.88
Solubility	water, alcohol, benzene
Molecular weight	137.14
Chemical Structure	 The chemical structure of methyl nicotinate is shown, featuring a pyridine ring attached to a methyl ester group. The structure is displayed over a faint background of the Parchem logo and name.
