Typical Product Specifications & Properties

p-Nitro Benzoic Acid

CAS Number: : 62-23-7

Specifications	Limits
Density	1.5497
Melting Point	238 c
Insolubility	in cold water
Molecular weight	167.12
Solubility	alcohol, acetone hot water
Chemical Structure	 The chemical structure of p-Nitro Benzoic Acid is shown. It consists of a benzene ring with a carboxylic acid group (-COOH) at the top position and a nitro group (-NO₂) at the para position (bottom). The carboxylic acid group is shown with a double bond to the ring and a single bond to an OH group. The nitro group is shown with a single bond to the ring and a double bond to a nitrogen atom, which is further bonded to two oxygen atoms.
