## Typical Product Specifications & Properties

# Platinum(0)-1,3-divinyl-1,1,3,3-tetramethyldisiloxane complex solution

CAS Number: : 68478-92-2

| Specifications | Limits                                                                                                                                          |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Sensitivity    | Moisture Sensitive                                                                                                                              |
| Form           | Liquid                                                                                                                                          |
| Solubility     | Miscible with toluene/ xylene/ isopropyl alcohol/ double-vinyl silicone oil and vinyl terminated poly(dimethylsiloxane). Immiscible with water. |
| Flash Point    | >110° (230°F)                                                                                                                                   |
| Density        | 0.984                                                                                                                                           |
| Formula Weight | 474.68                                                                                                                                          |
