## Typical Product Specifications & Properties

# propyl levulinate

CAS Number: : 645-67-0

| Specifications     | Limits                                                                             |
|--------------------|------------------------------------------------------------------------------------|
| Chemical Structure |  |
| Appearance         | colorless clear liquid                                                             |
| Boiling Point      | 220.00 to 221.00 °C. @ 760.00 mm Hg                                                |
| Acid Value         | 1.00 max. KOH/g                                                                    |
| Vapor Pressure     | 0.110000 mm/Hg @ 25.00 °C                                                          |
| Assay              | 98.00 to 100.00 %                                                                  |
| Flash Point        | 190.00 °F.TCC                                                                      |
| Odor               | sweet caramellic                                                                   |
| Specific gravity   | 0.98900 to 0.99500 @ 20.00 °C                                                      |
| Pounds/Gallon      | 8.239 to 8.289                                                                     |
| Refractive Index   | 1.41900 to 1.42500 @ 20.00 °C                                                      |
| logP (o/w)         | 0.93                                                                               |
