Typical Product Specifications & Properties

Sodium ethylate

CAS Number: : 141-52-6

Specifications	Limits	
Molecular weight	68.05	
Density	0.868 g/mL at 25 °C	
Stability	Reacts violently with acids, water. Incompatible with chlorinated solvents, moisture. Absorbs carbon dioxide from the air. Highly flammable.	
Merck	14,8613	
Refractive Index	1.386	
Melting Point	260 °C	
Boiling Point	91°C	
Solubility	Soluble in ethanol and methanol.	
BRN Number	3593646	
Sensitive	Moisture Sensitive	
Vapor Density	1.6	
Water solubility	Miscible

Specifications	Limits
Storage Temperature	Store at R.T.
Flash Point	48 °F
Vapor Pressure	<0.1 mm Hg (20 °C)
Atmospheric OH Rate Constant	6.17E-12 cm3/molecule-sec
log P (octanol-water)	-2.690
Form	Liquid
Color	Yellow to brown
