## Typical Product Specifications & Properties

# Sucrose Octaacetate

CAS Number: : 126-14-7

| Specifications             | Limits                                                                                               |
|----------------------------|------------------------------------------------------------------------------------------------------|
| Direct Evaporative Cooling | above 285 c                                                                                          |
| Assay                      | 98% min                                                                                              |
| Density                    | 1.28                                                                                                 |
| Boiling Point              | 250°C                                                                                                |
| Melting Point              | 78 - 85°C                                                                                            |
| Refractive Index           | 1.4660                                                                                               |
| Odor                       | wh. need., pract. odorless, intensely bitter taste                                                   |
| Molecular weight           | 678.60                                                                                               |
| Solubility                 | ether, methanol, chloroform, 1100 parts water, 11 parts alcohol, 22 parts ccl4, oxygenated and aroma |
