## Typical Product Specifications & Properties

# Tetrabutylammonium Chloride Hydrate

CAS Number: : 37451-68-6

| Specifications   | Limits                                        |
|------------------|-----------------------------------------------|
| Molecular weight | 295.93                                        |
| EINECS           | 214-195-7                                     |
| SMILES           | <chem>O.[Cl-].CCCC[N+](CCCC)(CCCC)CCCC</chem> |
| Melting Point    | 41-44 &deg;C                                  |
| Sensitive        | Hygroscopic                                   |
| Flash Point      | >230 &deg;F                                   |
