## Typical Product Specifications & Properties

# Thymol Blue, Sodium Salt

CAS Number: : 62625-21-2

| Specifications   | Limits                                                     |
|------------------|------------------------------------------------------------|
| Molecular weight | 488.57                                                     |
| EINECS           | 263-650-6                                                  |
| Color            | Orange                                                     |
| Stability        | Stable.                                                    |
| BRN Number       | 3861515                                                    |
| Form             | Powder                                                     |
| Melting Point    | 283-285 &deg;C (dec.)                                      |
| Water solubility | Soluble in waterSoluble in 0.1N hydrochloric acid/ethanol. |
| Solubility       | 95% ethanol: 10 mg/mL, clear, dark green                   |
| Density          | 0.979 g/mL at 25 &deg;C                                    |
