## Typical Product Specifications & Properties

# valeraldehyde dibutyl acetal

CAS Number: : 13112-65-7

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Appearance         | colorless clear liquid                                                              |
| Specific gravity   | 0.83300 to 0.83900 @ 25.00 °C                                                       |
| Boiling Point      | 251.00 to 252.00 °C. @ 760.00 mm Hg                                                 |
| logP (o/w)         | 4.86                                                                                |
| Assay              | 97.00 to 100.00 %                                                                   |
| Pounds/Gallon      | 6.931 to 6.981                                                                      |
| Refractive Index   | 1.41700 to 1.42300 @ 20.00 °C                                                       |
| Flash Point        | 125.00 °F.TCC                                                                       |
| Vapor Pressure     | 0.127000 mm/Hg @ 25.00 °C                                                           |
| Odor               | sweet nutty                                                                         |
