## Typical Product Specifications & Properties

# Vanadium Tetrachloride

CAS Number: : 7632-51-1

| Specifications             | Limits                                                                              |
|----------------------------|-------------------------------------------------------------------------------------|
| Density                    | 1.82 kgl (30 c)                                                                     |
| Direct Evaporative Cooling | slowly to vcl3 cl2 r.t.                                                             |
| Melting Point              | -28 c                                                                               |
| Molecular weight           | 192.75                                                                              |
| Solubility                 | ccl4 and donor solvs.                                                               |
| Boiling Point              | 154 c                                                                               |
| Chemical Structure         |  |
