## Typical Product Specifications & Properties

# Xylene

CAS Number: : 1330-20-7

| Specifications        | Limits                                                                              |
|-----------------------|-------------------------------------------------------------------------------------|
| Density               | 0.86                                                                                |
| Kauri-Butanol Number  | 98                                                                                  |
| Practically Insoluble | in water                                                                            |
| Odor                  | char. sweet odor                                                                    |
| Vapor Pressure        | 6.72 mm hg (21 c)                                                                   |
| Refractive Index      | 1.4970                                                                              |
| Molecular weight      | 106.16                                                                              |
| Color                 | colorless clear liquid                                                              |
| Flash Point           | (cc) 29 c                                                                           |
| Solubility            | abs. alcohol, ethanol, diethyl ether, many org. liqs.                               |
| Boiling Point         | 137-144 c                                                                           |
| Chemical Structure    |  |
