## Typical Product Specifications & Properties

# Zinc cyanide

CAS Number: : 557-21-1

| Specifications   | Limits                                                                                      |
|------------------|---------------------------------------------------------------------------------------------|
| Molecular weight | 117.42                                                                                      |
| EINECS           | 209-162-9                                                                                   |
| Density          | 1,85 g/cm3                                                                                  |
| Merck            | 14,10135                                                                                    |
| BRN Number       | 4124366                                                                                     |
| Sensitive        | Hygroscopic                                                                                 |
| Water solubility | Soluble in alkalis, potassium cyanide and ammonia.<br>Insoluble in water and most solvents. |
| Melting Point    | 800 &deg;C                                                                                  |
