

Typical Product Specifications & Properties

Butyl Acrylate

CAS Number: 141-32-2

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of Butyl Acrylate, which consists of an acrylate group (CH₂=CH-C(=O)-O-) attached to a butyl group (-CH₂-CH₂-CH₂-CH₃). Below the structure is the Parchem logo, which features two interlocking circles and the text "parchem fine & speciality chemicals".</p>
Purity	99.5 Min
Lel (VOL %)	1.5
Refractive Index (40° C)	1.4156
Latent Heat (Kcal/kg °C)	9.1 +/- 0.5
Specific Gravity (25°C); USP <841>	0.896 ~ 0.901
Inhibitor (MEHQ)	11 - 21 ppm
Viscosity (cS @ 25°C)	0.856
Specific Heat (Kcal/kg °C)	0.46
Waters %	0.5 Max
Heat Of Polymerization	18.5
